

***Interplanted buckwheat seeds throughout and nasturtium seeds along back part of structure.**

Butternut Squash

planted: 5/2/2017
8 seeds around
watering well,
thin to 3 plants

Still growing: 9/12/17
About 5 butternut
squash on vine and
still ripening

**Pattypan Squash,
*Sunburst***

Planted: 5/4/2017
Removed 9/5/17

Zephyr Squash

Planted: 5/4/2017
Removed 9/5/17

Spaghetti Squash

Planted: 5/2/2017
8 seeds around
watering well,
thin to 3 plants

Last harvest: 9/5/17
Removed 9/5/17

Notes:

5/16/17 - All seeds germinated, except Zephyr Squash, buckwheat growing well
5/23/17 - Zephyr Squash has germinated, buckwheat in flower, no germination of nasturtium yet
6/13/17 - Nasturtium seeds have germinated. Butternut and spaghetti squash tied to encourage growing up the structure, buckwheat getting ready to drop seed, and squash bugs found.
6/20/17 - Zephyr squash and pattypan have set fruit
7/25/17 - Two spaghetti squash, zephyr and pattypan harvested
8/15/17 - More spaghetti squash, butternut squash, pattypan and zephyr squash harvested. Vines showing signs of disease and dying back, but still producing.
9/5/17 - All vines removed except Butternut Squash which continues to grow. Area prepped and seeded with cover crops (diakon radishes, crimson clover, cereal rye and vetch)
